Cease and Desist Order

Dear Mr. Stevick:

This will confirm our conversation on July 16, 1980, regarding the handling of the green colored sludge disposed of by Union Steel Products in 1971. We recognize that this disposal was authorized by a letter written by Chester Harvey of the Water Resources Commission, but it was specified that the material be kept separate of other refuse. In preliminary discussion with Randy Senger of the Michigan Department of Natural Resources, he indicates that this material is probably a hazardous waste and should under no circumstances be co-mingled with any other wastes.

Therefore, we must reaffirm that the area where this material is deposited must not be disturbed until further notice. Further, material that has been co-mingled should be removed and stockpiled adjacent to existing sludge disposal area.

We will be contacting you within the near future as to the dispensation of this material and area once laboratory analysis has been completed. If you have any questions, please contact this office.

Very truly yours,

TED R. HAVENS, R.S., DIRECTOR
